## **About ICCSA Foundation**

ICCSA is a not-for-profit organization incorporated in 2021, under the companies act 2013. It is committed to provide a better world for the people and the planet. This organization is established with a focus to plug the gaps in environmental management, to provide an institutional platform for coordination, facilitation, advocacy, and regional and international collaboration; with an aim of development of targeted solutions. Its focus is to restore ecosystem health, regenerate nature on Earth to drive sustainable development for a future which is bright, positive and resilient.

ICCSA's key priorities are to promote local, regional and global partnerships to take effective action for climate and sustainability and to assess impacts of environmental and climatic variability on livelihoods, well-being and economic development. ICCSA provides strengthening knowledgebase on environmental matters for effective responses, by delivering basic science and technology-oriented solutions at grass root level for inclusive development of the communities. ICCSA aims to provide design, research and evidence-based support to government and industries on policy formulation. This also facilitates new coalition and partnership to accelerate climate

action and transform our societies towards a sustainable future without sacrificing human development goals.

ICCSA works in an integrated and coherent way to achieve objectives of our national missions/flagship programs while pursuing climate action and sustainable development. The organization understands the world's pressing problems and develops effective solutions to them through focus on the nexus between climate change and sustainable development in developing-country settings. It develops innovative solutions and research best practices for climate change adaptation and mitigation efforts by involving businesses and governments to help them transform commitments into action.
